more than and equal to 10 years but less than 20 years	4%	2%												
more than and equal to 20 years	6%	7%												
4	Program that demonstrate the use of Nested if- if within another if													
5	Write a program to display the first 10 natural numbers.													
6	Write a program to display n terms of natural number and their sum													
7	Write a program to display the multiplication table of a given integer.													
8	Program to demonstrate the concept of nested loop													
9	Program to count all uppercase characters													
10	Program to count no of vowels													
11	Program to convert uppercase into lowercase and vice versa and not to use built in functions													
12	Program to capitalize first and last letters of each word of a given string													
13	Write a program which should change all the multiples of 5 in the list to 5 and rest of the elements as 0.													
14	Write a code in python which divide all those list elements by 7 which are divisible by 7 and multiply list elements by 3.													
15	Write a program in python, to add 5 in all the odd values and 10 in all the even values of the list .													
16	Program to count total prime nos within the range													

17	Write a program that creates a third tuple after adding two tuples. Add second after first tuple.	
18	Program to calculate the average of the numbers of the tuple.	
19	Program to store book id, book name and price of three books and store the data in dictionary name "dict"	
20	Dictionary menu based Program	

Q1 #WAP Take two integer values from user and print greatest among them.

```

no1=eval(input("enter no1: "))

no2=eval(input("enter no2: "))

if(no1>no2):

    print("no1 is greater than no2")

elif(no2>no1):

    print("no2 is greater than no1")

elif(no1==no2):

    print("both are equal")

else:

    print("PLEASE ENTER VALID NO ONLY")

```

""

output

enter no1: 3

enter no2: 4
