PROJECT CLASS XI

Create a Menu Driven Program with a neat and attractive output in your Project for Class XI.

Some samples of the topics:

1. A menu driven program to print specifications for either a circle or a rectangle or a cylinder.

    If the user selects circle then print the area and circumference of the circle after taking in the

    radius as an input. Etc.

    e.g:

    Please select any of the following:

    a. Circle

    b. Rectangle

    c. Cylinder

2. A menu driven program to input a string and then print any specifications according to the users choice.
